# The first hybrid crypto exchange: key features

Qurrex will become the first cryptocurrency exchange benefiting from a synergy of:

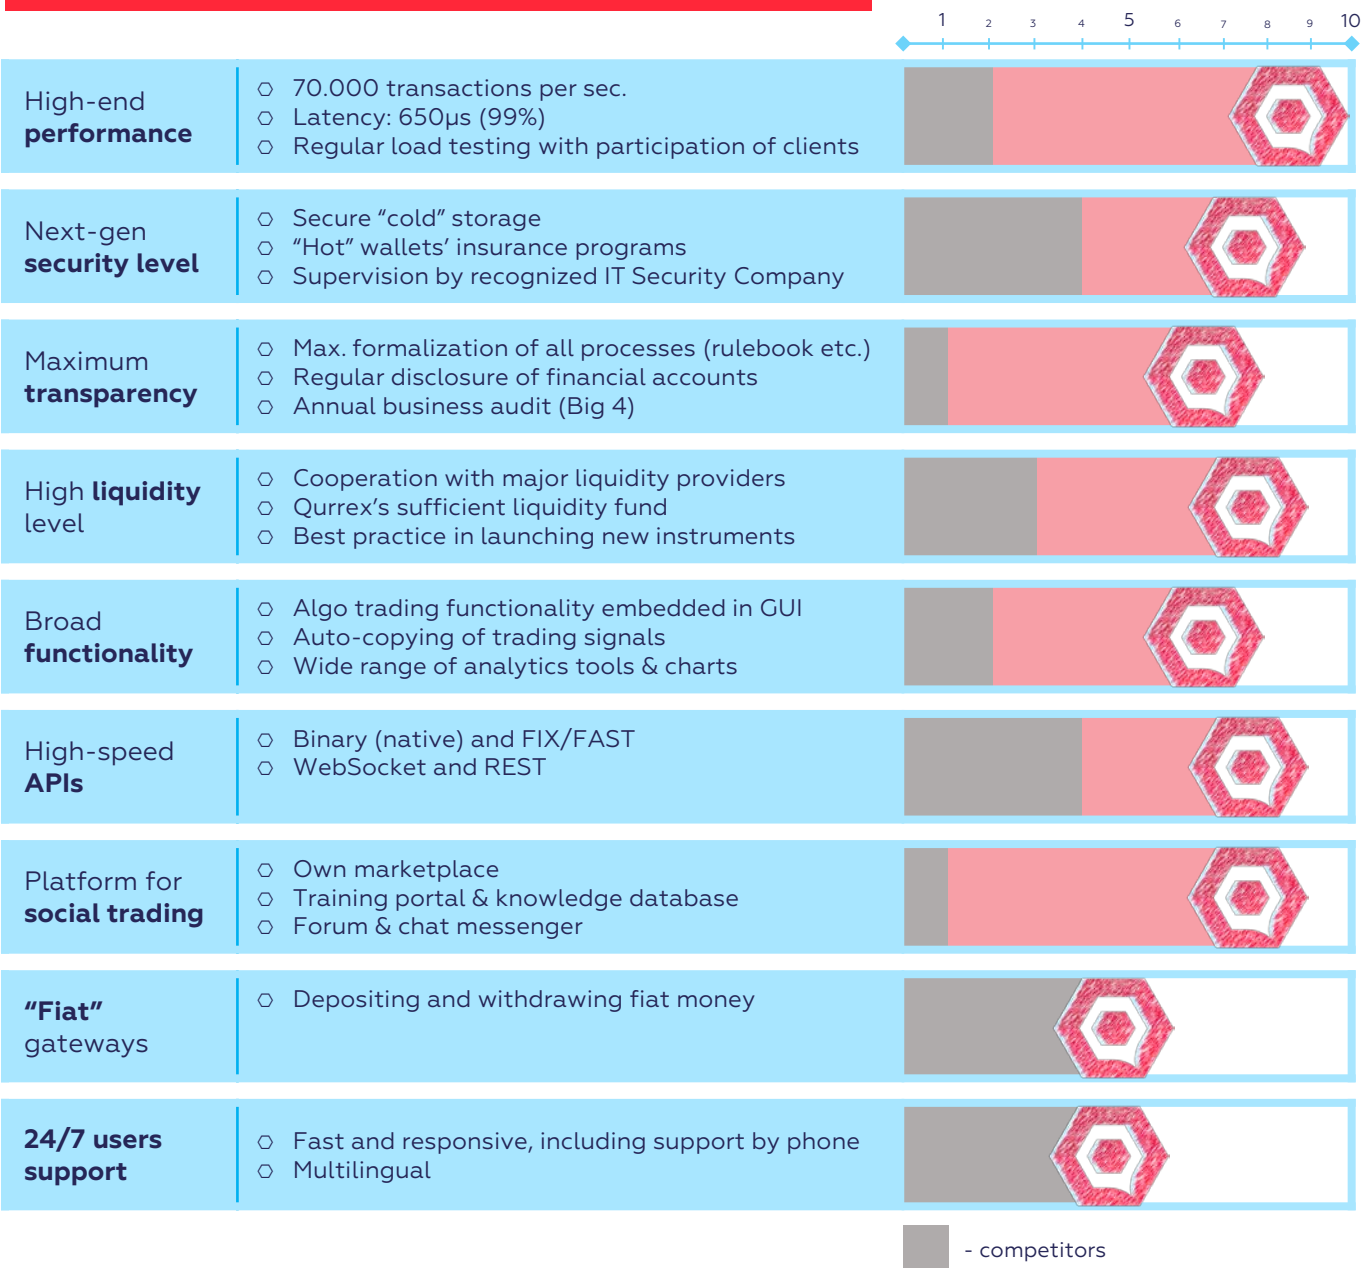

- High-end performance architecture comparable to leading stock exchanges (NASDAQ, NYSE, LSE)
- Decentralized network's opportunities

Qurrex has been designed to meet the challenges of dramatic growth of cryptocurrency trading.

Qurrex solves the main problems of current users of existing cryptocurrency platforms (performance, security, liquidity issues, etc.).

Qurrex creates favorable conditions for a new wave of participants in the crypto world (brokers and institutional investors).

## Key features of our platform vs competitors

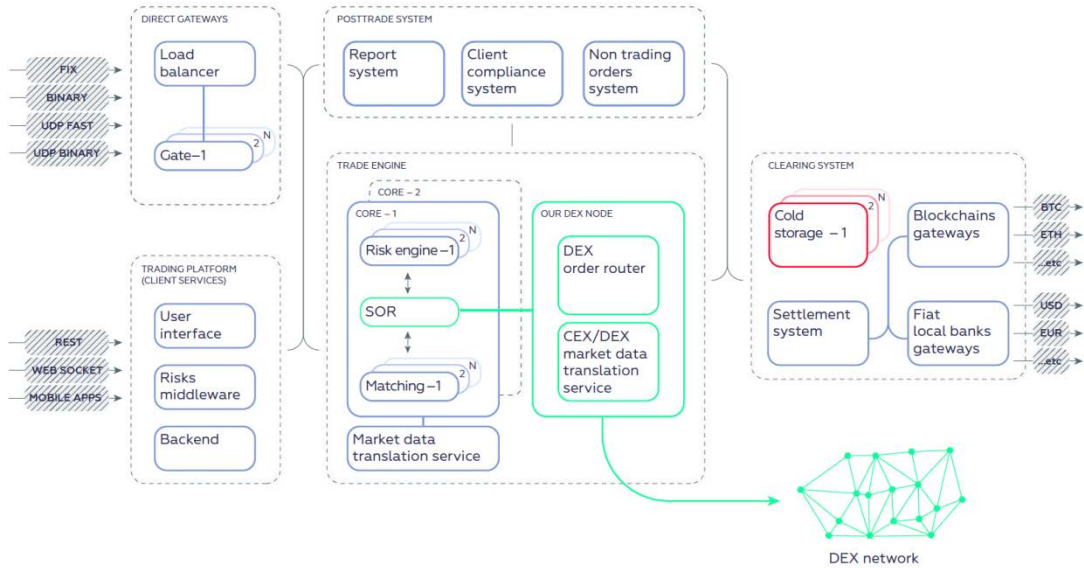

## Hybrid D(C)EX architecture

### Synergy of:

**blockchain technology** - ensures secure storage, eliminates intermediary and provides aggregated liquidity from all network nodes, including the centralized node

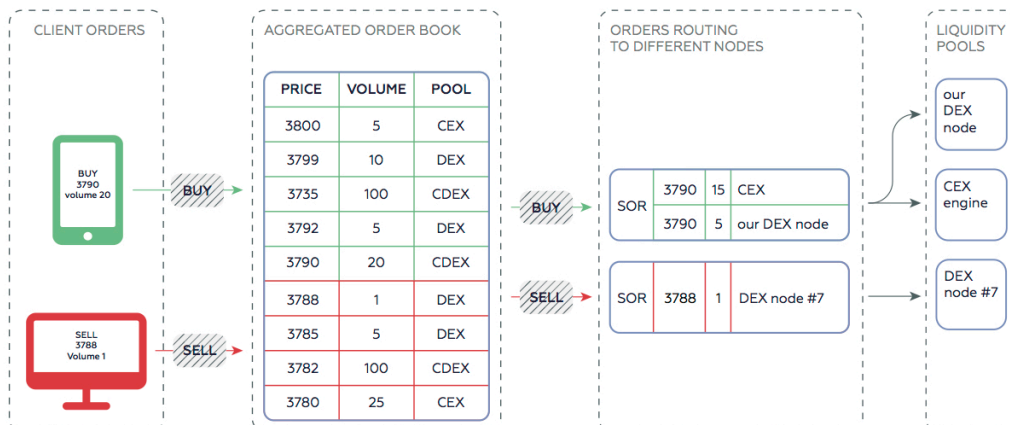

**centralized node = centralized exchange (CEX)** with performance comparable to modern, cutting edge stock exchanges

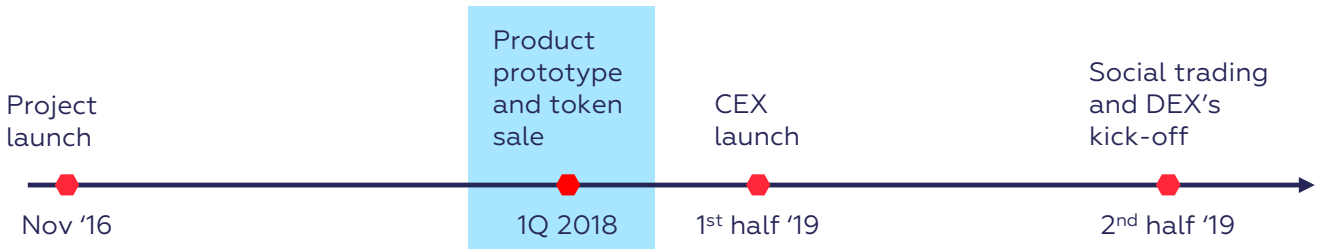

## Smart routing & Aggregated book

The **featured functions** of the hybrid exchange:

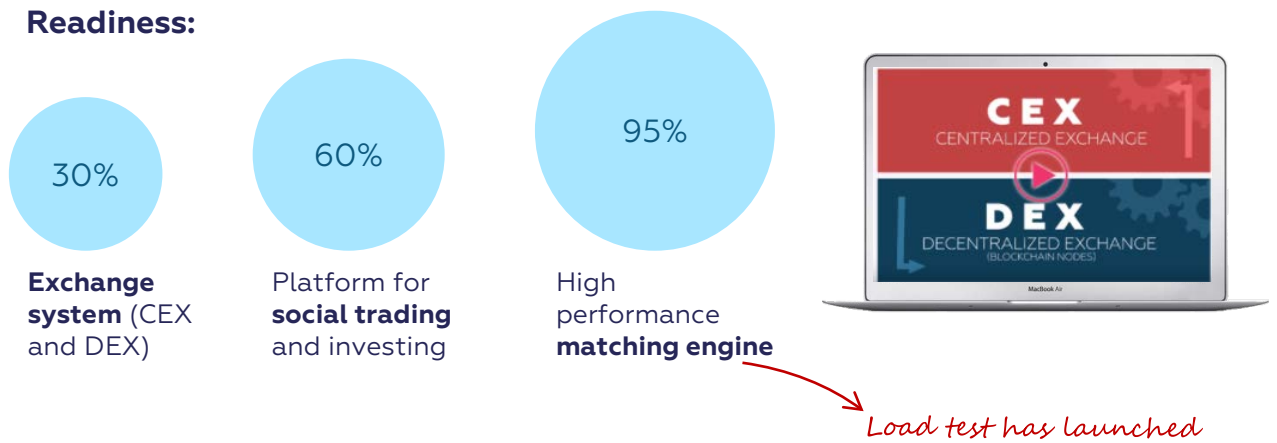

- formation of an aggregated order book based on quotes collected from all the system's nodes (both the centralized and decentralized nodes);
- dissemination of the aggregated order book to the blockchain nodes;
- choice of the blockchain nodes with the best instrument prices/quotes to place the order submitted by a client (if the order is not marketable, it is entered in the order book of the original system node);
- sending the order to the selected system node (for marketable order); entry of information on the order into the blockchain (for queuing order);
- receipt of execution confirmation.

## Timeline

## Readiness:

## Team leaders

**Matthijs Johan Lek,  
Founder and CEO**

Mathijs Johan has worked in finance for 20 years, including investment banking, brokerage, and business development.

Under his lead there is a team of traders and advisors with wide experience on FX market, development of trading strategies, algorithms, trading robots. Over the recent years, the team has been actively trading on the cryptocurrency market.

**Slava Baikalov,  
Co-Founder and Head of East Europe Office**

Slava for 10+ years specializes in corporate finance, investment banking, investment analysis, M&A and fundraising.

Few years ago he became the crypto enthusiast and cryptotrader.

**Andrey Sitaev,  
CTO**

Andrey's team comprises 17 frontend and backend developers with a remarkable software development background.

Andrey and his team focus on .NET framework and have been successfully implementing margin trading algorithms since 2008. Andrey has led development of a Forex analytical / trading platform TradeSharp.

**Konstantin Sviridenko:**

- **Adviser, Chairman of QURREX's Supervisory Board**
- **Board member of St. Petersburg Stock Exchange,**
- **CEO of Investment System «Voskhod»**

Konstantin and his team have a proven track record in development of trading & clearing systems and creation of financial instruments at stock and derivatives exchanges across Eastern Europe (RTS, St. Petersburg Stock Exchange, Investment System Voskhod, Ukrainian Exchange). Qurrex will hire Konstantin as a consultant on creating the platform and building all operational, IT and business processes from scratch.

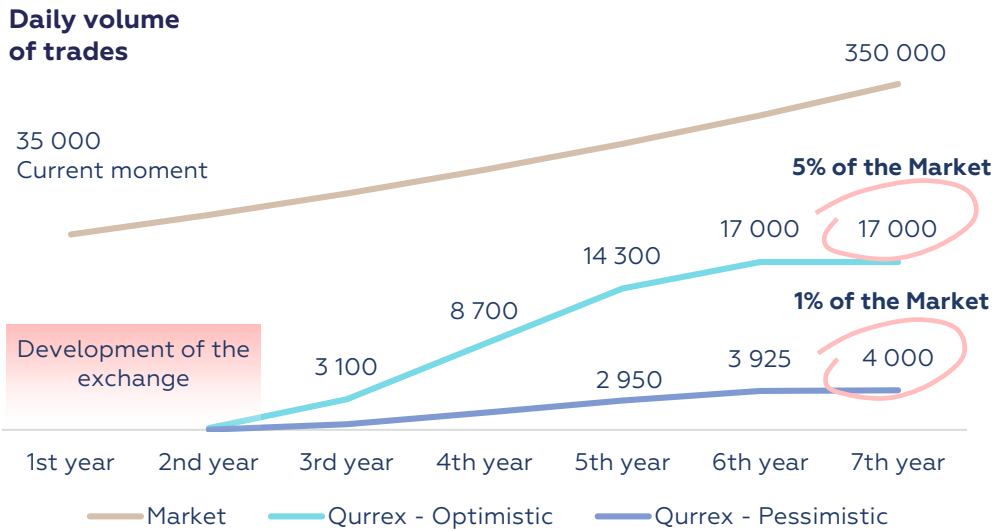

**Our team includes more than 120 professionals**

The first hybrid crypto exchange:  
project economy

**Qurrex growth estimation**
